Department of Commerce
Ministry of Commerce and Industry
Government of India**

INTRODUCTION:

“The Greatest danger in times of turbulence is not the turbulence- it is to act with yesterday’s logic”
Peter Drucker

Increasing globalization and liberalization of the world economy has seen a rapid increase not only in the growth of the international trade but also in the complex nature of problems posed by sweeping changes in the systems of international business. The opportunities and challenges presented by the increasing internationalization of business are growing and to manage them successfully the need for the knowledgeable and skilled professionals/managers is assiduously growing. This program therefore equips the students with a comprehensive knowledge and skills on various aspects of International business including the structure of International trade operations, regulatory guidelines, documentary formalities, shipping documents, packaging, security in international trade, transaction cost, freight forwarding, logistics and role of the other intermediaries etc.

In light of recession in the traditional markets of EU and USA, it becomes important to take an initiative to diversify our export markets and offset the inherent disadvantage for the exporters in emerging markets of Africa, Latin America, Oceania and CIS countries such as credit risks, higher trade costs etc., through appropriate policy instruments. New emerging markets have been given a special focus to enable competitive exports by deputing additional resources under the Market Development Assistance Scheme and Market Access Initiative Scheme. Further in light of various WTO agreements and initiatives taken by India towards signing of various regional and bilateral trading agreements, it does make sense for Indian exporters to consider diversifying from the traditional markets of USA, EU and Japan etc. to new emerging economies including LAC, Africa, ASEAN, Korea and other Asian markets etc.

Understanding that the export diversification is the need of hour, both start- up companies as well as established firms are looking forward to the managers having an in- depth understanding of doing business across various global markets and thus enabling companies to develop customized business plan and market entry strategies and thus prove to be an asset for firm’s expansion plans. The program thus coincides with the FTP declaration of doubling India’s exports of goods and services by 2020 through enhanced market access across the world and diversification of export markets by developing this requisite capability of understanding newer markets amongst our managers.

The primary objective of the program therefore is to build knowledge on the key aspects of export/import management, for participants in different cities across India and in the neighboring countries. Regular evaluation ensures that the participant has, indeed, imbibed both the knowledge and its applications thus enabling them to become the world class professionals and entrepreneurs in the fast-changing global environment.

PROGRAM OBJECTIVES

The primary objective of the program is to build knowledge on the key aspects of export/import management, knowhow on international business; market and buyer identification as per the post COVID shifts of consumer behavior; changing stringency of import regulations; new foreign trade policy; changing domestic regulatory framework on farm bills and its impact on exports; and tools for enhancing price competitiveness toward surviving in business in light of limited and reduced global demand. Both start-up companies as well as established firms are looking forward to the managers having an in-depth understanding of doing business across various global markets and thus enabling companies to develop customized business plan and market entry strategies

PEDAGOGY

The methodology adopted will be easy to understand with, far-reaching impacts. Lecture presentations, Group Work as well as the reality-based Case Studies with global perspectives would be the key, essentials and deliverables of the program. Sessions are designed to be interactive and participative. It will leverage the use of technology. It will consist of a judicious blend of lectures, real life case studies, quizzes and assignments.
